We got a lot of things going back there in the booth. Our desire is to provide both sound and visual enhancements that would make it easier for you to receive what God has for you in any of our services.

We want to be able to Equip & Encourage the believer through whatever media we have the ability to use. Likewise we also want to use those media tools to Evangelize the lost whether they are in this building or anywhere else on the planet that we may able to reach.

We are always in need of **prayer**, those who feel called to this ministry and especially those called having tech skills. We can promise you little if any worldly reward but if done "as unto the Lord" some awesome eternal reward and recognition you can give back to Jesus. You can talk to anyone you see working the booth for more info. If it's just prior to or immediately after a service and we seem to ignore you give us a little time to finish our tasks, we don't mean to offend we just have some stuff that we need to finish first. God bless!
